Technical Details

Intensity Level:	10 A
Track type:	Three-Circuit
Installation:	Track
Size:	98x98x33 mm
Height:	98 mm

Width:	98 mm
Length:	33 mm
Warranty:	3 Years
Certifications:	CE & RoHS, UKCA

Description

This 'Left Side' L-Shaped Connector for Three-Circuit Tracks allows us to connect two sections of track at a 90° angle. This allows us to connect two tracks which turn towards the left. The Connector is made from PC, a high quality and highly resistant material. Featuring four copper conductors necessary for connecting the three independent circuits to the Three-Circuit Track.

By choosing LED lighting, we'll increase our light quality, decrease our consumption and save on the maintenance of our lights. Also, **track lighting systems for shops provide unbeatably versatile and functional lighting.**

The ability to manoeuvre the lights is vital in commercial areas which are constantly changing, in which lighting must be adapted to match the presentation of displayed products at a given time.

Create your own LED track lighting systems with our 'Left Side' L-Shaped Connector for Three-Circuit Tracks, available now.
