Description

The Miseno Dark Grey Aluminium Double Sided Lighting Outdoor LED Surface Lamp is, without a doubt, a highly decorative and versatile lighting element that can adapt to any style.

This fitting requires two GU10 LED Bulbs and so, **by choosing one bulb or another, we can choose which type of light we want** for each area we're lighting. We just have to make sure that the bulbs are no longer than 62mm. Each spotlight on the Dark Grey Miseno LED Wall Light shines light in a different direction, **giving off a very interesting effect.**

The high quality aluminium finish and an IP54 Protection factor make this LED fitting highly resistant to dust and splashes of water. Therefore, we can install this Dark Grey Miseno Wall Light in many different places, like facades, hallways, terraces or entrances.

This light uses 2 x GU10 Bulbs that ARE NOT INCLUDED, but can be found [here](#).
