## Description

**The 30W New Mallet Dimmable UGR15 No Flicker LED Spotlight for Three Phase Track in Black** is the perfect solution to highlight a specific element in the space with a bright and high quality light, without renouncing to energy saving.

### Features of the 30W New Mallet Dimmable UGR15 No Flicker LED Spotlight for Three Phase Track in Black

The integrated COB source provides a brightness spread over an angle of 36°, giving a compact, high quality beam of light that reproduces colours without distorting them, perfect for complementing the general lighting of the space.

Designed for indoor spaces, it is made from quality materials such as aluminium and can withstand temperature variations of between -25°C and 45°C. Its installation is very simple and is carried out on a three-phase rail that we will have previously placed.

This LED spotlight for three-phase track has a modern finish in black and white. Its installation on the rail is really simple and, thanks to the quality of the components it integrates, it will satisfy the needs of the most demanding users.

The 30W New Mallet Dimmable UGR15 No Flicker LED Spotlight for Single Phase Track in Black is fully adjustable, allowing the light from the spotlight to be directed in any direction. This makes it possible to modify the lighting of the space depending on the elements that compose it. This is why this type of LED lighting is especially designed to focus attention on specific elements or areas.

### Applications of the 30W New Mallet Dimmable UGR15 No Flicker LED Spotlight for Three Phase Track in Black

Its applications are mainly in spaces such as showrooms, premises with different atmospheres, halls, shopping centres, clothes shops, furniture shops and, in general, commercial spaces that are always being readapted according to the products to be displayed. Even so, thanks to its elegant design, it can be used in the design of attractive interior environments, and even in the home.

**It can be oriented in any direction, allowing the angle of illumination to be changed according to the presentation of the products on display at any given time.** This spotlight can be used to enhance specific decorative elements, contributing to the creation of multiple atmospheres.
