Technical Details

Maximum Power:	144 W	Height:	86 mm
Voltage:	5V DC, 12V DC	Width:	41 mm
Intensity Level:	6 A	Length:	7 mm
Dimmable:	Controller, Remote Control	Detection Distance:	10 m
Light Colour:	Monochrome	Remote Control:	RF
Use:	Indoor	Warranty:	3 Years
IP Protection:	IP20	Certifications:	CE & RoHS, UKCA
Size:	86x41x7 mm		

Description

This small controller for 5/12V LED Strips allows us to adjust the brightness and speed of the LED lights, thanks to a convenient remote control. Pins not included.

Buttons:

ON/OFF = Turns the LED strip ON or OFF.

LIGHT = Changes to static mode

100% = Sets the LED brightness to 100% intensity.

50% = Sets the LED brightness to 50% intensity.

25% = Sets the LED brightness to 25% intensity.

BRIGHT+ / BRIGHT- = Increases or decreases the brightness of the LED strip.

MODE+ / MODE- = Changes from dynamic mode to static mode or between different dynamic modes.

SPEED+ / SPEED- = Increases or decreases the speed of the light in the different dynamic modes.
