Description

The 12V power supply is ideal for connecting interior lighting systems that cannot be used with direct connection to the electrical network. It transforms the alternating supply of the electrical network, to 12V in continuous.

It has a nominal power of 60W. **Use indicated for permanent loads of up to 50W** . Its output current is 5A.

Its aluminum casing gives it great resistance and lightness. It has the CE and RoHS certificates that guarantee the quality and safety of the product, and also confirm that it does not contain toxic or dangerous materials.

It has a regulator through which we can adjust the continuous output voltage between a minimum of 10V and a maximum of 15V.
