Brand:	SAMSUNG

Description

This Adjustable Support for SAMSUNG UFO LED High Bays has a design that is perfectly suited for UFO High Bays.

These industrial LED High Bays **stand out for their power and high light performance**. They're generally used in very open areas with high ceilings, such as in warehouses, logistics centres or factories. They're **anchored to the wall using a hook system** with the luminaire facing straight down. Although this is normally enough, some situations require installation on a wall or in a corner, or maybe you just want to point the light in a specific direction.

In order to get around these types of installation, here at LEDKIA we have accessories like this **Adjustable Support for SAMSUNG UFO LED High Bays, which allow us to adjust the light up to 180°**, depending on the needs of each moment.

* Only compatible with SAMSUNG UFO LED High Bays

* SAMSUNG UFO LED High Bays NOT INCLUDED.
