

Models

Colour

☐ White

Ref:

35745-74994

Technical Details

Tension	220-240V AC
Rated Voltage	100-240V AC
Frequency	50-60 Hz
Current Intensity	16 A
Use	Indoor
IP Protection	IP20

Material	Pc
Installation	Surface
High	50 mm
Wide	50 mm
Colour	White

Description

The Single Surface Switch is the ideal solution for **controlling the same light from two different switches**. These type of switches are widely used in corridors where one switch is placed at either end of the hall. It is also used in bedrooms where one switch is placed at the entrance and the other at the side of the bed. During installation, the phase must pass through the two switches before connecting to the lamp and also both switches must be connected via pair of cables.

They offer great resistance and durability as well as a simple and fast installation because it is a surface switch, it does require additional work.

It complements your electrical installation for any space with the different sockets and plugs available in our wide range of products that we offer at LEDKIA.
