Technical Details

Material:	PE	**Air Temp. For Operation:**	-10 ºC / +125ºC
Diameter:	9 mm	**Warranty:**	3 Years
Length:	1 m	**Certifications:**	CE

Description

The Polyethylene heat-shrink tube has a **high shrinkage ratio of 3:1 (9-3mm)** and is 1 meter in length. It is ideal to cover irregular or complex shapes thanks to its capacity to shrink to a third of its original size. The adhesive liner in this tube, when melted, provides a watertight seal, which encapsulates the cable joints.

Applications include the following:

- Applications include the following:
- Watertight encapsulation and sealing of cable joints.
- Electrical insulation.
- Environmental protection against moisture, dust and chemicals.
- Mechanical protection against abrasion on cables and small parts.
- Pulling protection at cable and connector joints to prevent damage caused by bending.
- Bundling and organisation of cables and tubes.Colour coding of cables and components.
- They do not act as a means of fire propagation.
- The fumes emitted are transparent and therefore do not obstruct vision.
- They do not cause irreversible damage to the health of persons exposed to the combustion gases of the cables for twenty minutes.
