## Technical Details

<b>Track type:</b>	Single-Circuit	<b>Length:</b>	20 mm
<b>Size:</b>	71x71x20 mm	<b>Warranty:</b>	3 Years
<b>Height:</b>	71 mm	<b>Certifications:</b>	CE & RoHS, UKCA
<b>Width:</b>	71 mm		

## Description

**The L Connector for UltraPower Single Phase Track** allows two sections of single phase track to be connected at a 90° angle, allowing several straight sections to be combined into a larger track system.

This connector incorporates the necessary copper conductors to ensure that electricity reaches all points in the system. It can operate in a wide range of temperatures from -5°C to 45°C. It is made of high quality materials and is reinforced with a steel plate at the bottom, making it highly resistant to knocks and bending.

**LED lighting for shops based on rails provides great versatility, as it allows the luminaires to be moved.** This is especially useful in the tertiary sector, where it is important to have lighting that adapts to the ever-changing layout of the different products on display. On the other hand, we are obtaining higher quality light while reducing energy consumption.
