Colour Temperature	Ref:
☐ Warm White 2800K - 3200K	74206-150743
☐ Daylight 3800K - 4200K	74206-150749
☐ Cool White 5700K - 6200K	74206-150754

Technical Details

Adjustable	No	**Detection Angle**	360 °
Light points	1	**It works with battery**	Yes
Brightness	70 lm	**Battery Capacity**	2200 mAh
Use	Outdoor	**Type of Load**	Solar
IP Protection	IP65	**Useful life**	40,000 Hours
Material	Pc, Aluminum, ABS	**Tiempo de carga Máximo**	8 h
Installation	Surface	**Tiempo de carga Mínimo**	6 h
High	130 mm	**Autonomía Máxima**	8 h
Wide	130 mm	**Contains battery**	Yes
Lenght	400 mm	**Light color**	Cool White, Daylight, Warm White
Weight	1.42 kg	**Color Temperature**	5700K - 6200K, 3800K - 4200K, 2800K - 3200K
Detector	Radar		

Ambience
Description

This 40cm Solar Kenya LED Step Light with Radar Motion Detector IP65 incorporates a Radar presence detector and a solar panel that allows its 2200 mAh battery to be recharged. This Solar Step Light does not need to be connected to the power grid. Its operation is very simple, the solar panel incorporates a light sensor, so that during the hours of the day, the panel is fed and charges the battery integrated in the Step Light. **When the light sensor detects that the night has begun, it automatically turns on the Step Light.**

Its IP65 protection ensures high protection against water and correct operation outdoors. In order to maintain the IP65 protection, the customer must ensure that all the components supplied are correctly fixed and secured.

Its Radar light sensor allows the Step Light to detect the movement of a person. By means of a button we can choose between the two available options.

Safety lighting option: After about 30 seconds without detecting movement it emits 30% of the total lighting.
Total Off option: After about 30 seconds without detecting movement, it turns off completely.

Take another step on the road to energy efficiency with the 40cm Solar Kenya LED Step Light with Radar Motion Detector IP65 and join the clean energy revolution.
