Description

The **1m Recessed Aluminium Profile with Diffused Light for LED Strips** allows for a simple and elegant installation of LED strips. This profile is installed recessed, in a variety of installation option with indoor LED strips, especially designed to create lines of light under shelves, tables, mouldings, etc... Perfect for protecting and hiding the LED strips, allowing professional, clean and stylish installations. They are ideal for lighting modern environments with a clean and elegant indirect light.

Includes a 1 metre translucent cover to join the 1 metre aluminium sections together.

Characteristics of the 1m Recessed Aluminium Profile with Diffused Light for LED Strips

The profile offers the possibility to mount two types of clips included for your choice. The translucent cover is suitable for various decorative applications such as creating lines of light on the walls of your home
