Description

This 3M Cable Jacket Repair Tape is a reparation tape used for industrial cables that's resistant to water and abrasion. It's made of a resistant, flame-retardant, flexible and durable material with a full guarantee from the well-known 3M brand. **It's 1.52mm thick, the width of the tape is 50mm and the tape has a full length of 1.8 metres.**

It's main use is for repairing cable jackets that are subject to intense wasting. It can be used in outdoor areas for applications such as transport, heavy machinery, generators and temporary cable installations, underground cable distributions, petrol and gas, wind centers and telephone towers.
