## ***Description***

The 30W AR111 CREE Dimmable LED Adjustable Surface Spotlight in Black features two light sources using COB technology, with a brightness of 800 lumens each. Within a 24° angle, it provides top quality light that guarantees a faithful and natural representation of colours.

This type of lighting perfectly complements general lighting in any space. **It's surface-mounted and requires 4 screws to be secured to the metal support.** Both drivers are joined and pre-wired, which drastically simplifies the installation of these spotlights. The unit can be rotated 350° on its axis.
