Technical Details

Tension	220-240V AC
Frequency	50-60 Hz

Use	Outdoor
IP Protection	IP65

## Description

This Controller is designed for Flexible 220V Neon RGB LED Strips and includes an IR (infrared) remote control with 24 buttons and a 6 metre range, with which it's possible to remotely manage RGB channels efficiently. With this controller we can choose the desired colour and effect, and at the same time adjust the brightness and speed of the transitions.
