

Models

Battery Capacity	Ref:
120000 mAh	7333-16903
250000 mAh	7333-16905

Technical Details

Use	Indoor	Lenght	224 mm
IP Protection	IP20	Weight	59.1 kg
High	522 mm	Battery type	AGM
Wide	240 mm	Battery Capacity	250000 mAh, 120000 mAh

Description

This UP-SP AGM 12V Deep-Cycle Monoblock Battery is a monoblock battery with AGM technology that doesn't require periodical maintenance throughout its working life. It's ideal for small solar installations, emergency lights, counter-fire systems, telecommunications, sprinkler systems, etc. The battery comes in a compact format so that it's easy to transport and install.

This product has been designed and developed to offer the best features, especially when reducing corrosion and increasing its lifespan, this is achieved thanks to its AGM separator in conjunction with the specific manufacture of the components of the plates ensuring their durability and reliability.

The battery offers high resistance to cycles of deep and repeated discharge, being its duration of more 500 cycles at 75% of discharge depth.
