Technical Details

High	1 mm
Wide	10 mm
Lenght	33000 mm

length	33 m
Brand	3M

Description

This tape, made by the 3M Company, is a double-sided adhesive tape made from acrylic foam and highly adhesive materials, which offers exceptional durability and resistance to moisture, and high temperatures (up to 121°C).

It's easy to use, from sticking to the wall to cutting off pieces, and in some cases it may make a good substitute for liquid adhesives, staples, rivets or any other kind of fastener.

*The tape is 33 metres long, 10mm wide and 1mm thick.
