

Models

Colour Temperature	Ref:
 Warm White 2800K - 3200K	518-1226
 Cool White 6000K - 6500K	518-1227
 Daylight 4000K - 4500K	518-1865

Technical Details

Power	48 W	Material	Aluminum
Tension	220-240V AC	Colour	White
Rated Voltage	85-265V AC	Installation	Recessed
Frequency	50-60 Hz	High	36 mm
Electric Insulation Class	II	Diameter	600 mm
Adjustable	No	Weight	2.65 kg
Light Source	OSRAM	Room Temperature Work	-22 °C~+45 °C
Color Rendering Index (CRI)	80	Includes	Driver
Brightness	3950 lm	Useful life	40,000 Hours
LED Performance	80 lm/W	Selectable Opening Angle	120
Type of Lens	Frost	Light color	Daylight, Cool White, Warm White
Use	Indoor	Color Temperature	4000K - 4500K, 6000K - 6500K, 2800K - 3200K
IP Protection	IP20	Energy Efficiency 2023 (EU-2019/2015)	F
IK Protection	IK05	Revisión Control de Calidad	No

Description

The Round 48W UltraSlim LED Panel offers an illumination of 3,950 lumens, without compromising the compact design that characterises this type of lighting solution.

Like the lower power models it operates directly at 220-240V AC and supports multi-voltage from 85V to 265V AC. **The light it emits is of high quality, as reflected by its colour rendering index** of 80. As a result, colours are represented very naturally, without distortion.

Advantages of the Round 48W UltraSlim LED Panel

LED lighting stands out as the **most efficient and durable solution for the lighting of all types of spaces**. Its long useful life of 30,000 hours allows us to completely forget about maintenance and having to replace the lights as they melt.

The Round 48W UltraSlim LED Panel, is available at our online lighting shop Ledkia with two years guarantee.
