Description

The 150cm Slim Tri-Proof Enclosure for LED Tube with One Side Connection IP65 allows us to install a T8 tube and keep it protected from dust and humidity.

With this type of waterproof enclosure for LED tubes we will have a luminaire that we will be able to place a LED tube with a great lumen capacity and that **supports perfectly the inclemencies of the weather thanks to its protection factor IP65**. As it is manufactured in PC, this Tri-Proof enclosure 150cm LED tube is extremely resistant to impacts.

It can be attached to any surface using stainless steel clips. On the other hand, the **150cm Slim Tri-Proof Enclosure for LED Tube with One Side Connection IP65 already incorporates all the wiring and the lamp holders necessary for operation**.

Discover all the possibilities of LED lighting with the Tr-Prpof displays that we offer at our online shop, Ledkia.

*Tubes Not Included

*The Tri-Proof enclosure can be adapted to connect a tube with two side connections.
