Ambience

Description

The Mini Villa Wall Lamp with PIR Motion Detector is, without a doubt, a highly decorative and versatile element that will adapt to any style. This wall lamp requires an E27 LED bulb and therefore, depending on the bulbs we select, we will define the type of light we want for the room to be illuminated. Just keep in mind that the bulbs can have a maximum width of 62mm. It can be fixed to any type of surface by screwing the lamp to any wall.

Giving a modern touch to your lighting has never been as easy as it is now, thanks to the range of Outdoor Lamps that we offer at LEDKIA

Uses 1 E27 bulb NOT INCLUDED in the product.
