Colour

☐ Grey

Ref:

6109-14113

## Technical Details

<b>Tension</b>	220-240V AC
<b>Rated Voltage</b>	100-240V AC
<b>Frequency</b>	50-60 Hz
<b>Current Intensity</b>	10 A
<b>Use</b>	Outdoor

<b>IP Protection</b>	IP54
<b>Installation</b>	Recessed
<b>Room Temperature Work</b>	-10 °C~+40 °C
<b>Colour</b>	Grey

## Description

This switch is the ideal solution for providing a design touch to the switches in your home and having IP54 Protection against water.

**Multi-way switches allow us to control the same light from two different switches. These are widely used in hallways as we can control the main light from either end of the hall, or you can also use it in bedrooms, one at the door and one at the bed.** During installation, the live wire must pass through both switches before connecting to the lamp and also both switches must be joined by a pair of cables.

They're highly resistant and durable. Also, they're made from a thermoplastic that's free of halogens and does not propagate flames. These switches can be installed onto any surface.
