Technical Details

Power:	350 W
Frequency:	50-60 Hz
Input:	100-240V AC
Output:	24V DC
Intensity Level:	14.6 A
Protection Class:	I
Use:	Indoor
IP Protection:	IP20
Material:	Aluminium

Size:	30x115x215 mm
Height:	30 mm
Width:	115 mm
Length:	215 mm
Total Weight:	0.720 kg
Warranty:	3 Years
Certifications:	CE & RoHS, TÜV
Brand:	MEAN WELL

Description

The 24V power supply is ideal for connecting interior lighting systems that cannot be used with direct connection to the electrical network. It transforms the alternating supply of the electrical network, to 24V in continuous.

It has a nominal power of 350W. **Use indicated for permanent loads of up to 280W** . Its output current is 14.6 A.

Manufactured by the prestigious brand Mean Well, it is light and compact. Its aluminum casing gives it great resistance. It has the CE and RoHS certificates that guarantee the quality and safety of the product, and also confirm that it does not contain toxic or dangerous materials.

It has a regulator through which we can adjust the continuous output voltage between a minimum of 20V and a maximum of 25V.
