

## Models

Colour Temperature		Ref:
	Warm White 2700K	6268-14463
	Cool White 5000K - 5500K	6268-14465

## Technical Details

<b>Adjustable</b>	No	<b>Detection Angle</b>	120 °
<b>Light points</b>	1	<b>It works with battery</b>	Yes
<b>Brightness</b>	330 lm	<b>Battery Capacity</b>	3000 mAh
<b>Use</b>	Outdoor	<b>Type of Load</b>	Solar
<b>IP Protection</b>	IP65	<b>Tiempo de carga Máximo</b>	8 h
<b>Material</b>	Pc, Aluminum, ABS	<b>Space</b>	Terraces / Balconies, Yard
<b>Colour</b>	Black	<b>Tiempo de carga Mínimo</b>	6 h
<b>Installation</b>	Surface	<b>Autonomía Máxima</b>	8 h
<b>High</b>	800 mm	<b>Contains battery</b>	Yes
<b>Diameter</b>	230 mm	<b>Light color</b>	Cool White, Warm White
<b>Detector</b>	Radar	<b>Color Temperature</b>	5000K - 5500K, 2700K

## ***Ambience***

## Description

**Solar Yuma LED Light with Radar Motion Detection - Turns OFF/Security Lighting - IP65 allows us to recharge its 3000mAh battery.** This Solar light doesn't need to be wired to the mains. It's easy to work and has a light sensor, so that during the day the battery included in the light will feed and charge. **At night, the lighting sensor automatically turns on the spotlight.**

**Its IP65 Protection assures a high level of protection against water and that the unit will work correctly in outdoor areas.** As a way of maintaining an IP65 rating, the client must make sure to check that all components are used and installed in the correct manner.

Its radar sensor allows the light to detect motion from a person. Using a button we can select between the two available options.

**Security Lighting Option:** After 15 seconds without detecting movement, it emits 20% total brightness.

**Complete Off Option:** After 15 seconds without detecting movement, it turns Off.

Take a step forward in energy efficiency with this Solar Yuma LED Light with Radar Motion Detection - Turns OFF/Security Lighting - IP65 and join the clean energy revolution.
