

Models

Colour

☐ White

Ref:

35754-75021

Technical Details

Voltage:	220-240V AC
Multi-Voltage:	100-240V AC
Frequency:	50-60 Hz
Intensity Level:	16 A
Use:	Indoor
IP Protection:	IP20
Material:	PC

Installation:	Surface
Size:	50x50 mm
Height:	50 mm
Width:	50 mm
Warranty:	3 Years
Certifications:	CE & RoHS, UKCA

Description

The Dual Surface Switch is the ideal solution for **controlling the same light from two different switches**. These type of switches are widely used in corridors where one switch is placed at either end of the hall. It is also used in bedrooms where one switch is placed at the entrance and the other at the side of the bed. During installation, the phase must pass through the two switches before connecting to the lamp and also both switches must be connected via pair of cables.

They offer great resistance and durability as well as a simple and fast installation because it is a surface switch, it does require additional work. A dual switch allows us to control two luminaires or receivers.

It complements your electrical installation for any space with the different sockets and plugs available in our wide range of products that we offer at LEDKIA.
