Description

A frame made with the best materials and a clean, fresh and compact design is what this **1 Module PC Frame in Black or White** offers.

This frame is the perfect product for any device or electrical system in the home or office. This model is specifically designed for electrical bases that supply energy to an element or appliance and is presented in a classic white colour, which allows it to be coordinated with the decoration of any space where it is installed.

Its installation is very simple, and it can be installed either horizontally or vertically. Its measurements are 86 x 86 millimetres and 9.5 millimetres in depth. Noteworthy is **its thermostable manufacturing material**, which extends the lifespan of the product and allows it to **resist both low and high temperatures without deteriorating the colour**, which is undoubtedly a true commitment to safety.
