Description

The Double Modern RJ45 Internet Socket consists of two RJ45 sockets. The module is the standard size and is compatible with most flush and surface mounting boxes. With the glass frame which is available in the accessories section, it will provide a professional finish to the installation.

It is normally installed flush and is recommended for indoor use only. It is CE and RoHS certified. Made of polycarbonate, the internet **socket module is highly resistant and durable**. It complements the electrical installation of any space with the different sockets and inputs from our extensive catalogue.

*RJ45 CAT 5e
