Ref:

45574-91960

Technical Details

Cable Size:	6 mm ²
Size:	100000 mm
Length:	100000 mm

Air Temp. For Operation:	Max 120° C
Warranty:	3 Years
Certifications:	CE & RoHS, UKCA

Description

This Black PV ZZ-F Cable 6mm² is a single-filament conductor that's made of flexible copper with halogen-free rubber insulation and sheath.

The cable width is 6mm². The 6mm² sections are common in Solar installations for connecting solar panels to each other and for connecting solar panels to inverters or regulators. Or, it's used in domestic installations for connecting home appliances such as the oven, ceramic hob or the kitchen itself in general.

This is a flexible, robust cable that's adequate for difficult layouts, as with any outdoor conditions.

This conductor is free of halogens (does not propagate flames or fire), with low emission toxic gasses and no emission of corrosive gasses.

The nominal voltage of the cable is 1000V (0.6/1kV).

The technical denomination is: PV ZZ-F.
