## ***Description***

**This Larso Metal Solar Outdoor LED Floor Lamp is fitted with a solar panel to recharge its battery.** Both the solar panel and the battery are hidden inside the lampshade for a more aesthetic design. This Solar Lamp does not need to be connected to the mains. Its operation is very simple, the solar panel incorporates a light sensor, so that during daylight hours, the panel is powered and charges the battery integrated in the lamp. **When the light sensor detects that night has begun, it automatically switches the lamp on.**
