Description

The Lapisca Plaster Ceiling Lamp has an innovative and minimalist design. **It is made of Valgama**, a material composed of special gypsum, fibreglass and acrylic resins as well as other high quality elements that give the product properties of solidity and consistency comparable to products made of aluminium. Valgama is a compact, non-porous, fire-resistant and environmentally friendly material.

It can be painted or stuccoed as desired, offering a wide range of possibilities for new ideas and projects. It can be integrated with the paintwork and can also stand out by being painted in contrasting colours with respect to the wall or ceiling on which it is installed.

Unalterable over time and resistant to environmental factors such as heat and cold. It does not rust or deteriorate. It can be used indoors and outdoors (always in covered places and without contact with rain). Recommended for any room where indirect decorative light or companion lighting is required. **It can be placed in spaces as varied as bedrooms, living rooms, halls, corridors, hallways, distributors, rooms, etc.**

Uses 1 GU10 bulb NOT INCLUDED in the product.
