Technical Details

Tension	220-240V AC	Working temperature	0 °C~+40 °C
Frequency	50-60 Hz	Battery operated	Yes
Dimmable	No	Type of battery	Ni-Cd
Use	Indoor	Number of batteries	1
IP protection	IP20	Battery voltage	4.8 V
Height	38 mm	Battery Capacity	3000 mAh
Width	205 mm	Certificates	RoHS, CE, UKCA
Length	114 mm	Contains battery	Yes

Description

This Driver with Battery is designed for 15W to 65W LED Panels. This driver comes with a 4.8V 3aH Ni-Cd battery with an autonomy of up to 3 working hours to keep the luminaire on (3W approximately) in the event of a power outage.

Perfect for providing emergency lighting for offices, shops, etc.

Don't let a power outage become a problem thanks to the Driver with Emergency Battery for LED Panels available at LEDKIA.
