Colour

 Black

Ref:

7297-16597

Technical Details

Maximum Tension:	1500 V
Intensity Level:	32 A
Protection Class:	II
Cable Size:	6 mm ²
Use:	Indoor, Outdoor

IP Protection:	IP68
Material:	PC
Working Temperature:	-40°C-90°C
Warranty:	5 Years
Certifications:	CE & RoHS, TÜV

Description

These Flexible Multi-Contact MC4 3/1 Connectors are used for connecting 3 photovoltaic modules in parallel, integrated under cover or within any type of installation, with different cables with 4 to 6mm² dimensions which make up part of the installation. They feature a blocking system and they're easy to install.

The distance between one point on the connector and the other is 33cm.

Its design complies with the strict electrical requirements in photovoltaic installations, aside from offering safe connections and avoiding accidental disconnections.
