Installation:	Recessed

Warranty:	3 Years
Certifications:	CE & RoHS, UKCA
Brand:	SIMON

Description

Simon 82 Single TV Socket Mechanism with two connectors and one wire. Based on IEC 9.5 mm connectors. This socket belongs to Simon 75's wide and extensive range of items fully compatible with the 27, 82 and 31 series.

Comes with screw assembly system, insert operation, 7 mm stripped cable and has 6 to 8 mm of supported cable section.

The material with which it has been manufactured is based on metal components with halogen-free thermoplastic insulation. Its manufacture in these materials makes it capable of operating at optimum performance between 5 and 40°C, being able to be functional in extreme temperatures of up to -25 and 50°C.

This signal socket complies with all safety systems in accordance with the current regulations of EN 50083-2:2013.

Compatible with 82 Series Frames.

Does not include Cover, Only Mechanism.
