Technical Details

Track type:	Three-Circuit	Length:	32 mm
Size:	233x32 mm	Warranty:	3 Years
Height:	233 mm	Certifications:	CE & RoHS, UKCA

Description

This Flexible Connector for Three-Circuit Tracks allows us to easily connect two sections of track. This type of connector allows us to join sections with 0° to 360° turns. Therefore, it's the method we'll use if our design has a turn that's over or under 90°, as we wouldn't be able to use rigid connectors.

LED Track lighting is an interesting option for any shop or business as it combines all the advantages of LED technology, like better light quality, higher visual comfort, minimal energy consumption and the absence of elements like mercury. It also allows us to move the luminaires, a very useful feature in commercial environments as it makes it easier to adjust the light in order to correspond with the layout of displayed products.

Here you'll find the Flexible Connector for Three-Circuit Tracks together with all our LED Track lighting. **Get the best lighting for your business at the best price.**
