Track type:	Three-Circuit	Width:	70 mm
Installation:	Track	Warranty:	3 Years
Size:	30x70 mm	Certifications:	CE & RoHS, UKCA

Description

This 'I' Connector for a Three-Circuit Track is a basic and fundamental element in three-circuit LED track lighting systems. This connector allows us to lengthen our lighting system by combining different sections of track.

This connector is made from high quality materials and features copper conductors which are necessary for connecting the three independent circuits used by the track. It measures 30x70mm, meaning it's a perfect fit for our track.

LED track lighting is especially designed for commercial environments, which require a lighting system that will allow us to move our luminaires in accordance with products or decorative elements we wish to stand out. This type of lighting system is also used to light advertisements and decorations.

This 'I' Connector for a Three-Circuit Track is available in both black and white.
