Ambience

Description

The **Solar LED String Light for Bottle** is a novel way to add a touch of light with a very eye-catching look.

This garland brings a touch of fresh air to the decoration of any event, although they are very popular during Christmas celebrations. Because of the type of light they project, they create a very interesting effect, popularly known as fairy lights.

Battery operated and with a built-in solar panel, this LED bottle garland can be placed on any piece of furniture, such as a bookshelf, without the need for a light point nearby. It can also be placed outside without any problem thanks to its IP65 protection rating. It will undoubtedly become an eye-catching element. The most common spaces where we can see this type of decoration are living rooms, dining rooms, terraces and even kitchens.

What are you waiting for to surprise your guests with the most original lighting? Buy the solar LED bottle garland now at an unbeatable price at Ledkia, our online lighting shop.
