Description

The Surface Profile can be installed in all types of indoor LED strip installations, especially designed to **protect and hide the LED strips** whilst providing a professional, clean and stylish finish.

The staircase profiles are made of high quality anodized aluminium and are ideal for lighting modern environments with **clean and elegant indirect light**. It includes the possibility of mounting an opaque **translucent cover** to create diffused lighting and provide your room with a comfortable and welcoming atmosphere. For applications where **maximum light** is required it is recommended to mount a **transparent cover**.

The staircase profiles are suitable for different decorative applications, such as creating lines of light, lighting corridors or staircases, illuminating showcases and shelves, kitchen cupboard bottoms, aesthetic bathroom designs, handrails, furniture lighting, etc.

Have no limits and discover what you can do with the best lighting, available at LEDKIA, our online LED shop.

*Kit includes: 1 meter anodized aluminum profile, cover, mounting clips and side covers.
