

## Models

## Technical Details

Frequency	50-60 Hz
Current Intensity	12.5 A
Electric Insulation Class	I
Use	Indoor
IP Protection	IP20

Material	Aluminum
High	42 mm
Wide	98 mm
Lenght	200 mm
Revisión Control de Calidad	No

## Description

The 12V power supply is suitable for connecting indoor lighting systems that cannot be used with direct mains connection. It transforms the alternating power supply from the mains to 12V into direct current.

It has a nominal power of 150W. **Suitable for permanent loads up to 120W. Its output current is 12.5A.**

Its aluminium casing makes it highly resistant and lightweight. It has the CE and RoHS certificates that guarantee the quality and safety of the product, and also confirm that it does not contain toxic or hazardous materials.

It has a regulator by means of which we can adjust the continuous output voltage between a minimum of 10V and a maximum of 15V.

It also incorporates a voltage selector so that you can change the input voltage of the power supply, as depending on the country, one voltage or another is used.
