Installation:	Track	Warranty:	3 Years
Size:	31x31 mm	Certifications:	CE & RoHS, UKCA

Description

This Square End Cap for a Three-Circuit Track is **used to avoid any accidental contact with the copper conductors**. Therefore, it's a basic installation element that can be found in all sorts of systems.

Normally in the retail sector, depending on the type of activity, products are put on display, certain decorative elements may need to be lit or we may have to create different environments in just one room. This is where lighting plays a fundamental role and because of this, three-phase systems are a perfect and widely used choice. This gives us a **system which allows us to move luminaires and we also have three independent circuits in a single track**. All these features include the efficiency and long-lasting benefits LED lighting has to offer.

Here at LEDKIA, you can purchase this Square End Cap for a Three-Circuit Track, along with any tracks, spotlights or connectors necessary to create your own multi-functional lighting system.
