Installation:	Surface	Certifications:	CE & RoHS, UKCA

Description

The Flush-mounted junction box 170x110x50 mm is ideal for keeping all the connections of our installation inside the wall.

This box has several pre-drilled entries both at the base and at the sides. This gives us various possibilities when it comes to introducing the wiring. The Flush-mounted junction box 170x110x50 mm is designed for flush mounting.

The junction box that you can find at Ledkia, our online lighting shop, **has a high quality finish** and is CE and RoHS certified.
