Description

The 1.5W 12V G4 LED Bulb 120lm is perfect for installations where space is extremely limited.

Its 24 SMD3014 LEDs provide a brightness of 120 lumens at an opening angle of 360°. **It allows savings of up to 90% compared to G4 halogen technology solutions.** The quality of light is very high, as indicated by its colour rendering index of over 80.

The main applications of the 1.5W 12V G4 LED Bulb 120lm are in vehicles, bathroom lamps, etc... that operate at 12 volts. As it is made of epoxy, it is much more resistant to impacts than its conventional counterparts.
