Description

The 4W 470lm G9 LED Bulb is the ideal solution to replace small G9 bi-pin halogen bulbs of up to 40W, achieving an important reduction in energy consumption.

Features of the 4W 470lm G9 LED Bulb

Its high-efficiency SMD LEDs generate a luminosity of 470 lumens, which can be adjusted according to the needs of the moment, with an opening angle of 360°. The high colour rendering index guarantees faithful colour reproduction. It has an estimated life of 30,000 hours. Its exterior is coated with high-quality transparent epoxy resin that protects the components from shocks and vibrations.

The use of the 4W 470lm G9 LED Bulb is especially suitable for small spaces such as shelves, display cases or cabinets because they boast a very small size and do not give off heat. In addition, as they operate at 220V AC, we do not need to install any type of transformer.
