Description

The Round 15W UltraSlim LED Panel is a lighting solution that combines excellent performance with a very compact design.

With 1,200 lumens provided by its SMD2835 LEDs, **it is perfect as a general lighting element in all types of environments.** It is made of aluminium and has an opal diffuser that diffuses light and minimises glare. It will provide us with energy savings of up to 80% compared to a halogen luminaire.

Advantages of the Round 15W UltraSlim LED Panel

The main advantage of this element and, in fact, of all LED lighting **is the savings in the light bill it provides us with. It also allows us to reduce to a minimum the costs of maintenance and replacement of the luminaires.** The Round 15W UltraSlim LED Panel is, without a doubt, a clear example of this.

Thanks to the range of LED downlights that we offer you at Ledkia, you will be able to enjoy quality lighting at an incredible price.
