Description

This **TV Socket** consists of a TV socket and a plastic cover. The module has the standard size being compatible with most recessed and surface mounted boxes for mechanisms. The glass frame available in the accessories section will add a professional finish to the installation.

It is normally installed recessed and is recommended for indoor use only. It is CE and RoHS certified. Made of polycarbonate, the TV Module is highly resistant and durable. It complements the electrical installation of any space with the different sockets and entrances of our wide catalogue.
