IP Protection	IP68

Material	ABS
High	20 mm
Wide	30 mm
Lenght	260 mm
Useful life	40,000 Hours
Type of regulation	Controller
Power	3 W

Description

The **Aquarium Oxygenator with 3W RGBW IP68 LED Aquarium Light** is a lighting display for aquariums. The aquarium light allows you to decorate your aquarium with multiple colours for air bubbles.

Features of the Aquarium Oxygenator with 3W RGBW IP68 LED Aquarium Light

The display emits different types of lights thanks to its **9 integrated RGBW LEDs**. It includes a remote control to control the RGBW colours and brightness. This type of light is perfect for aquarium effects. It emits light in **16 colours and 4 dynamic modes**, which you can control with the 24-key remote control.

It is designed to be installed at the bottom of the fish tank with the help of the suction cups included. Its structure is made of ABS, which makes it sturdy and prevents corrosion problems. Its **IP68** rating indicates that the **product is sealed and watertight**, protected against complete immersion and dust. **It is supplied with a DC adapter power supply** and European type plug, which simplifies installation. This power supply is not protected against water due to its IP20 rating, so it should not be submerged in water under any circumstances. In addition, an aquarium **air pump can be installed** to create a cascade of bubbles with colourful effects.

Get the best lighting for aquariums of low consumption and at the best price in our online shop.

*Air pump not included.
