Description

The Banate Solar LED Pendant Lamp ILUZZIA is, without a doubt, a highly decorative and versatile element that can be installed in a large number of spaces such as balconies, canopies or outdoor passageways. It incorporates a monocrystalline solar panel in its upper part that allows the wall light's battery to be recharged.

Characteristics of the Banate Solar LED Pendant Light ILUZZIA

The Banate Solar LED Pendant Lamp ILUZZIA has a simple design which gives a modern touch to the place. Thanks to the built-in diffuser it will emit a uniform 3000K light. It incorporates a Li-on battery that is charged by a solar panel installed on top.

This pendant lamp comes with 3 levels of light intensity as well as 2 modes of use, the automatic mode that turns the light on when it gets dark and the manual mode that allows you to turn the lamp on whenever you like. The wind-up switch can be easily hidden by a magnet system.

Discover all the decorative outdoor options offered by the range of LED Pendant Lamps at our online shop Ledkia.
