## ***Description***

**The Emery Adjustable Aluminium Single Spotlight Ceiling Lamp is a luminaire that stands out for its versatility.**

This type of Spotlight **can be installed into various places, depending on the bulb we use.** If we go for a faint light, this will be ideal for creating a warm and cosy environment. If we opt for a cool bulb with a little less power, this will become the perfect auxiliary light to light up a reading area. It's designed for indoor use, although it can be used **in almost any environment, be it commercial or domestic.** It's mostly used in **shops, shop windows, commercial complexes, supermarkets, showrooms, living rooms, bedrooms, kitchens, hallways, etc.**

**Requires an E14 Bulb that IS NOT INCLUDED with the product.**
