## Description

**The 3.8W G9 COB LED Bulb is the ideal solution to replace small G9 bi-pin halogen bulbs of up to 35W**, achieving a significant reduction in energy consumption.

### Features of the 3.8W G9 COB LED Bulb

**Its high-efficiency COB LEDs generate a luminosity of 470 lumens with an opening angle of 360°.** The high colour rendering index ensures faithful colour rendering. The exterior is coated with high-quality transparent epoxy resin to protect the components from shocks and vibrations.

**The use of the 3.8W G9 COB LED Bulb is particularly suitable for small spaces such as shelves, showcases or cabinets because they boast a very small size and do not give off heat.** In addition, as they operate at 220V AC, we do not need to install any type of transformer.
